## native application

---

application program that has been developed for use on a particular platform or device.

Building for the native platform is a completely different UI and calls for a completely different UX.

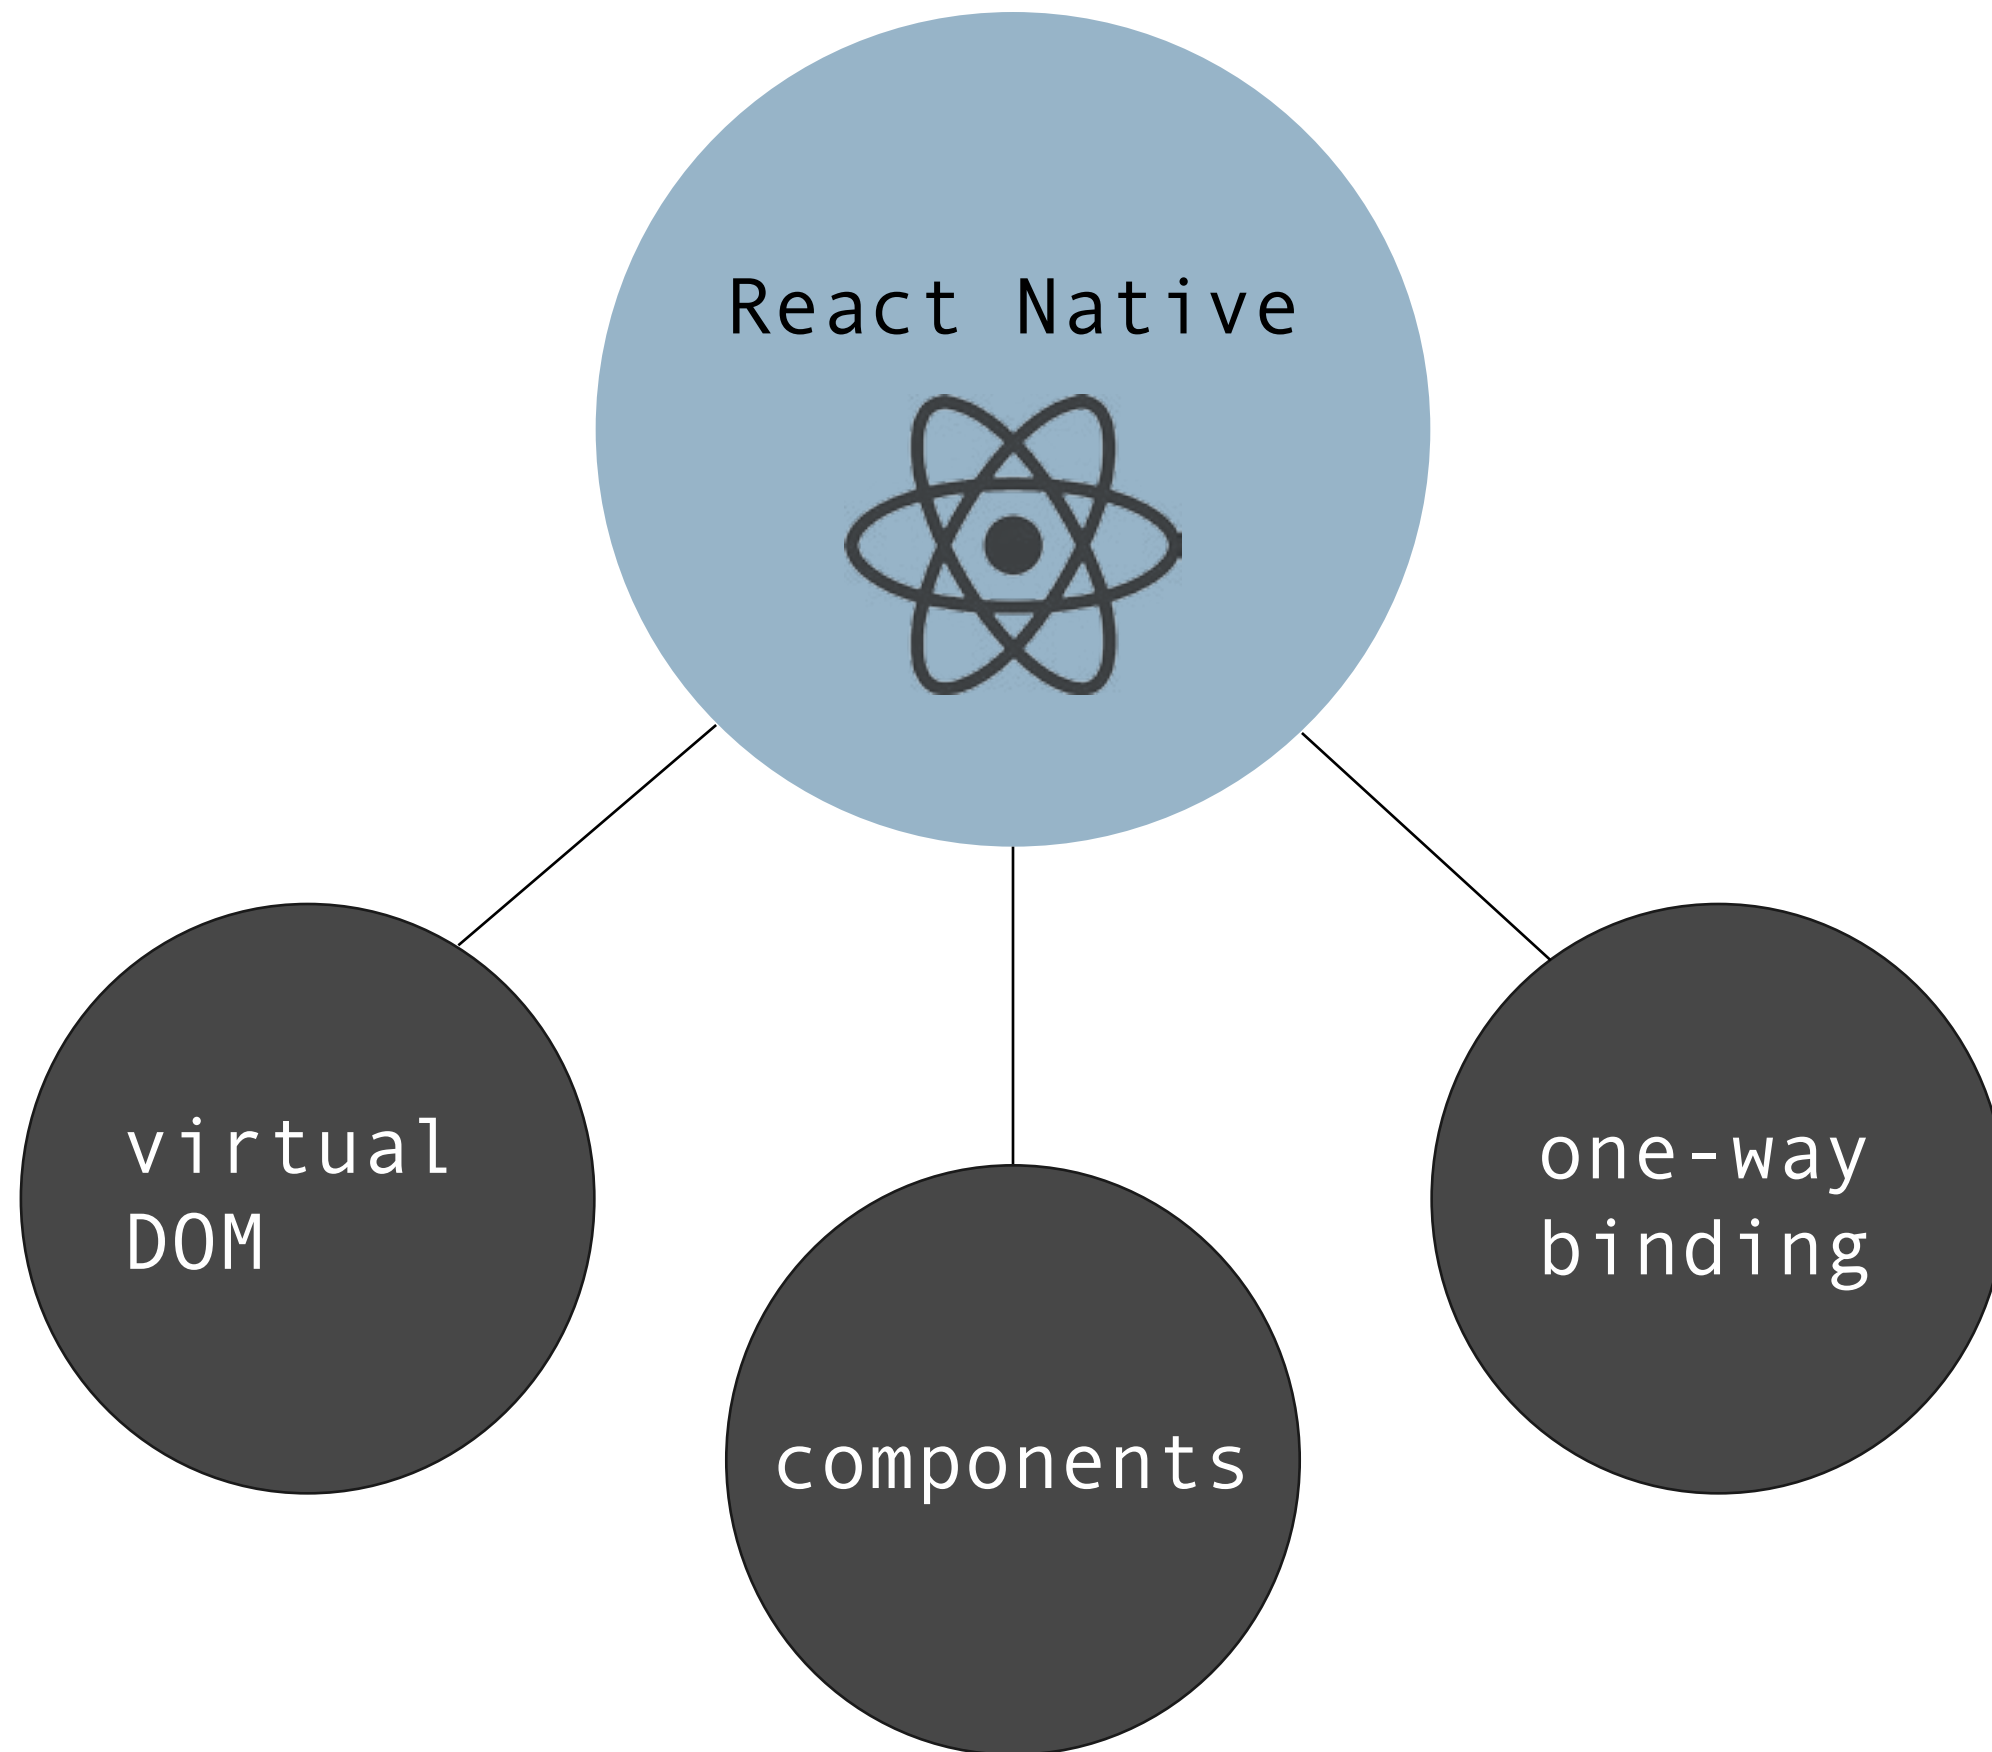

Java

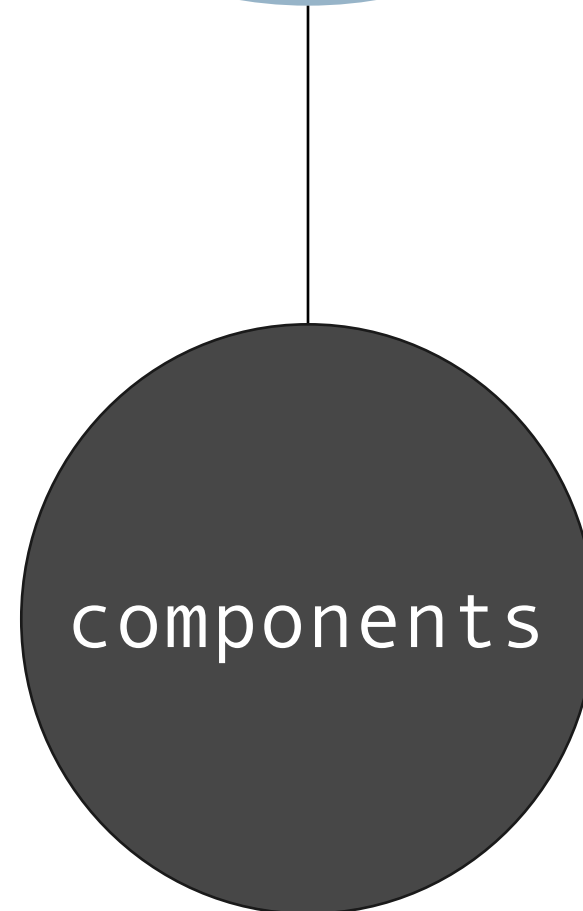

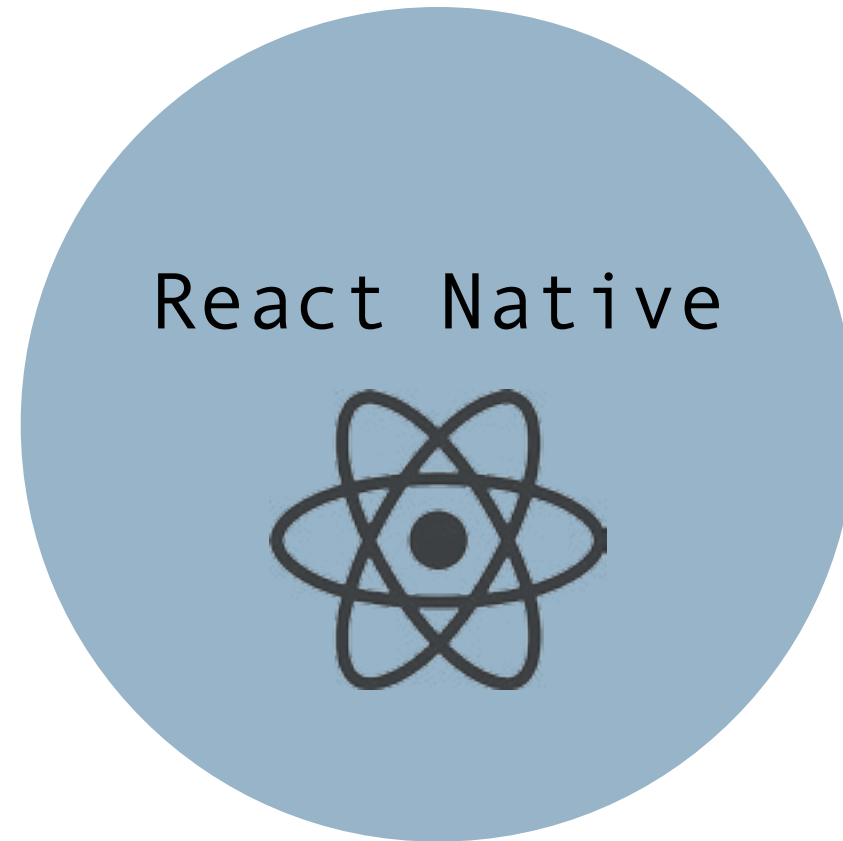

XML

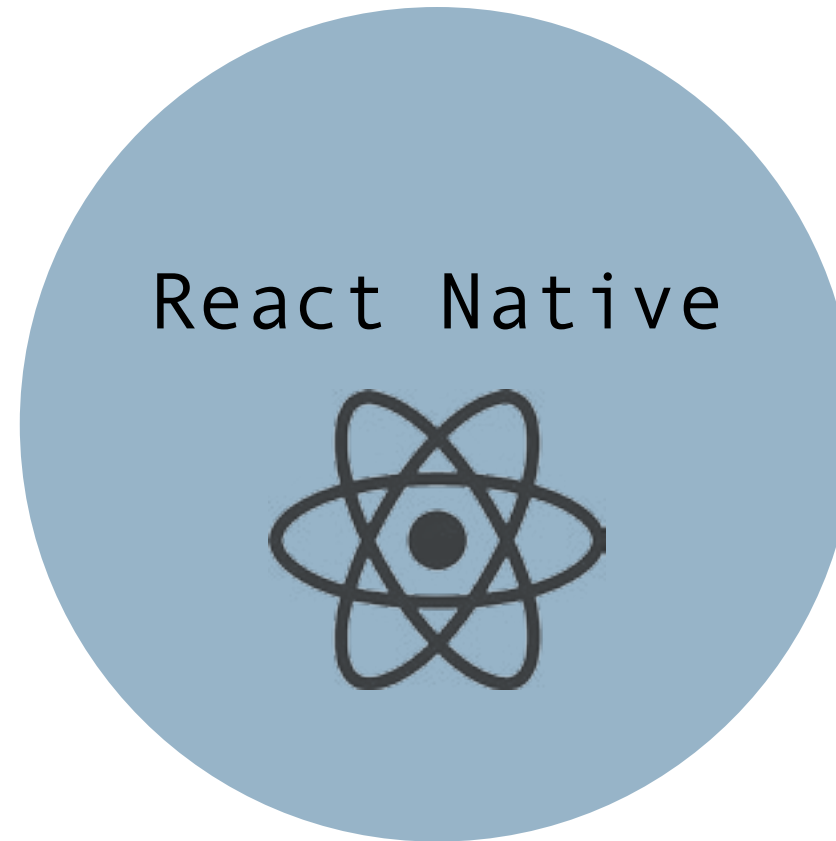

Swift

Objective-C

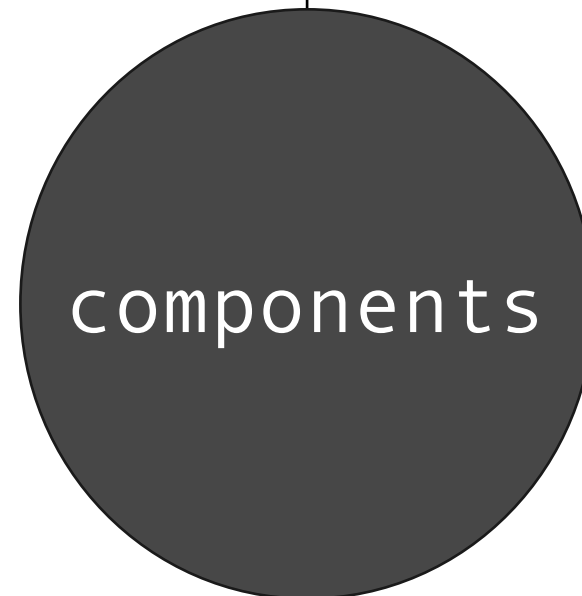

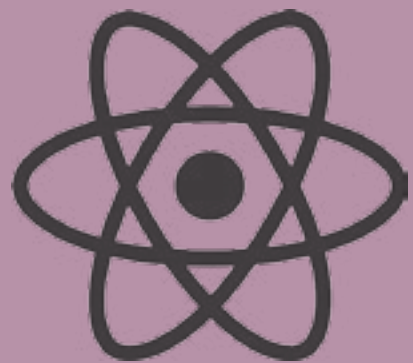

the fundamental  
building blocks  
of your app

allows for this  
'virtual DOM'  
to be a thing

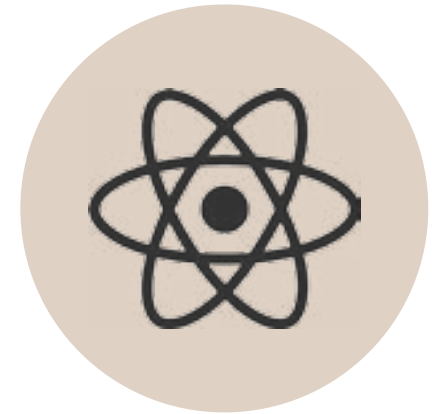

can compile iOS and Android code within the same project.

written in JavaScript or any language that compiles to JS.

live reloading.

instant updates without app store approval.

imperative native calls

---

`<div>` — `>` `<View>`

`<span>` — `>` `<Text>`

`<img>` — `>` `<Image>`
